TOXICOLOGY

SUBJECT INDEX

Volume 80 (1993)

age differences, cadmium, metallothionein, liver, kidney, testis, strain differences, sex differences, mouse strains, disposition, 51
analogues, epithelial type 2 cell, macrophages, pentamidine, toxicity, 1
anilidase, anilide, oleyl-anilide hydrolase, anilide toxicity, toxic oil syndrome, 131
anilide toxicity, anilide, anilidase, oleyl-anilide hydrolase, toxic oil syndrome, 131
anilide, anilidase, oleyl-anilide hydrolase, anilide toxicity, toxic oil syndrome, 131
Aroclor 1254, suspect carcinogen, 2,6-dinitrotoluene hepatocarcinogen, genotoxic chemical interaction, increased G.I. β-glucuronidase, potentiated DNA adduct formation, elevated urinary mutagenic metabolites, 153
atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart rate, heart weight, hypotension, prazosin, ventricle, 173

benzo[*a*]pyrene, ethanol, carcinogenic, rats, excretion, sex difference, 103
blastocyst, cadmium, embryotoxicity, preimplantation, implantation, nifedipine, zinc, metal uptake/efflux, 13
blood pressure, atenolol, carbon monoxide, cardiac hypertrophy, heart rate, heart weight, hypotension, prazosin, ventricle, 173

cadmium, embryotoxicity, preimplantation, implantation, blastocyst, nifedipine, zinc, metal uptake/efflux, 13
cadmium, metallothionein, liver, kidney, testis, strain differences, sex differences, age differences, mouse strains, disposition, 51
calcium, flow cytometry, hepatocytes, tributyltin, glutathione, thiol, 117
carbon monoxide, atenolol, blood pressure, cardiac hypertrophy, heart rate, heart weight, hypotension, prazosin, ventricle, 173
carcinogenic, ethanol, benzo[*a*]pyrene, rats, excretion, sex difference, 103
cardiac hypertrophy, atenolol, blood pressure, carbon monoxide, heart rate, heart weight, hypotension, prazosin, ventricle, 173
celluria, water loading, water deprivation, gentamicin nephrotoxicity, enzymuria, 141
clotrimazole, cytochrome *P*-450, inhibition, induction, 27
CYP2E1, oxidative stress, cytochromes P450, reactive oxygen species, glutathione, radical-trapping activity, 37
cytochrome *P*-450, clotrimazole, inhibition, induction, 27
cytochromes P450, oxidative stress, CYP2E1, reactive oxygen species, glutathione, radical-trapping activity, 37

2,6-dinitrotoluene hepatocarcinogen, Aroclor 1254, suspect carcinogen, genotoxic chemical interaction, increased G.I. β-glucuronidase, potentiated DNA adduct formation, elevated urinary mutagenic metabolites, 153
disposition, cadmium, metallothionein, liver, kidney, testis, strain differences, sex differences, age differences, mouse strains, 51
dose-response relationship, metallothionein, total cadmium intake, metallothioneinuria, logistic regression analysis, 207

elevated urinary mutagenic metabolites, 2,6-dinitrotoluene hepatocarcinogen, Aroclor 1254, suspect carcinogen, genotoxic chemical interaction, increased G.I. β-glucuronidase, potentiated DNA adduct formation, 153
embryotoxicity, cadmium, preimplantation, implantation, blastocyst, nifedipine, zinc, metal uptake/efflux, 13
enzymuria, water loading, water deprivation, gentamicin nephrotoxicity, celluria, 141
epithelial type 2 cell, macrophages, pentamidine, analogues, toxicity, 1
ethanol, benzo[*a*]pyrene, carcinogenic, rats, excretion, sex difference, 103
excretion, ethanol, benzo[*a*]pyrene, carcinogenic, rats, sex difference, 103

fertility, sodium metavanadate, testicular toxicity, Swiss mice, 199

flow cytometry, hepatocytes, tributyltin, calcium, glutathione, thiol, 117
free intracellular calcium, reactive oxygen metabolites, leukocyte activation, mineral dust, 71

genotoxic chemical interaction, 2,6-dinitrotoluene hepatocarcinogen, Aroclor 1254, suspect carcinogen, increased G.I. β-glucuronidase, potentiated DNA adduct formation, elevated urinary mutagenic metabolites, 153
gentamicin nephrotoxicity, water loading, water deprivation, enzymuria, celluria, 141
glutathione, flow cytometry, hepatocytes, tributyltin, calcium, thiol, 117
glutathione, oxidative stress, cytochromes P450, CYP2E1, reactive oxygen species, radical-trapping activity, 37

halogenated aromatics, structure-immunotoxicity relationships, 217
heart rate, atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart weight, hypotension, prazosin, ventricle, 173
heart weight, atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart rate, hypotension, prazosin, ventricle, 173
hepatocytes, flow cytometry, tributyltin, calcium, glutathione, thiol, 117
hypotension, atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart rate, heart weight, prazosin, ventricle, 173

implantation, cadmium, embryotoxicity, preimplantation, blastocyst, nifedipine, zinc, metal uptake/efflux, 13
increased G.I. β-glucuronidase, 2,6-dinitrotoluene hepatocarcinogen, Aroclor 1254, suspect carcinogen, genotoxic chemical interaction, potentiated DNA adduct formation, elevated urinary mutagenic metabolites, 153
induction, clotrimazole, cytochrome *P*-450, inhibition, 27
inhibition, clotrimazole, cytochrome *P*-450, induction, 27

kidney, cadmium, metallothionein, liver, testis, strain differences, sex differences, age differences, mouse strains, disposition, 51

leukocyte activation, free intracellular calcium, reactive oxygen metabolites, mineral dust, 71
lipid peroxidation, methyl linoleate ozonide, thiols, vitamin E, rat, 189
liver, cadmium, metallothionein, kidney, testis, strain differences, sex differences, age differences, mouse strains, disposition, 51
logistic regression analysis, metallothionein, dose-response relationship, total cadmium intake, metallothioneinuria, 207

macrophages, epithelial type 2 cell, pentamidine, analogues, toxicity, 1
metal uptake/efflux, cadmium, embryotoxicity, preimplantation, implantation, blastocyst, nifedipine, zinc, 13
metallothionein, cadmium, liver, kidney, testis, strain differences, sex differences, age differences, mouse strains, disposition, 51
metallothionein, dose-response relationship, total cadmium intake, metallothioneinuria, logistic regression analysis, 207
metallothioneinuria, metallothionein, dose-response relationship, total cadmium intake, logistic regression analysis, 207
methyl linoleate ozonide, lipid peroxidation, thiols, vitamin E, rat, 189
mineral dust, free intracellular calcium, reactive oxygen metabolites, leukocyte activation, 71
mouse strains, cadmium, metallothionein, liver, kidney, testis, strain differences, sex differences, age differences, disposition, 51

nifedipine, cadmium, embryotoxicity, preimplantation, implantation, blastocyst, zinc, metal uptake/efflux, 13

oleyl-anilide hydrolase, anilide, anilidase, anilide toxicity, toxic oil syndrome, 131
oxidative stress, cytochromes P450, CYP2E1, reactive oxygen species, glutathione, radical-trapping activity, 37

pentamidine, epithelial type 2 cell, macrophages, analogues, toxicity, 1
potentiated DNA adduct formation, 2,6-dinitrotoluene hepatocarcinogen, Aroclor 1254, suspect carcinogen, genotoxic chemical interaction, increased G.I. β-glucuronidase, elevated urinary mutagenic metabolites, 153
prazosin, atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart rate, heart weight, hypotension, ventricle, 173
preimplantation, cadmium, embryotoxicity, implantation, blastocyst, nifedipine, zinc, metal uptake/efflux, 13

radical-trapping activity, oxidative stress, cytochromes P450, CYP2E1, reactive oxygen species, glutathione, 37
rat, methyl linoleate ozonide, lipid peroxidation, thiols, vitamin E, 189

rats, ethanol, benzo[*a*]pyrene, carcinogenic, excretion, sex difference, 103
reactive oxygen metabolites, free intracellular calcium, leukocyte activation, mineral dust, 71
reactive oxygen species, oxidative stress, cytochromes P450, CYP2E1, glutathione, radical-trapping activity, 37

sex difference, ethanol, benzo[*a*]pyrene, carcinogenic, rats, excretion, 103
sex differences, cadmium, metallothionein, liver, kidney, testis, strain differences, age differences, mouse strains, disposition, 51
sodium metavanadate, fertility, testicular toxicity, Swiss mice, 199
strain differences, cadmium, metallothionein, liver, kidney, testis, sex differences, age differences, mouse strains, disposition, 51
structure-immunotoxicity relationships, halogenated aromatics, 217
Swiss mice, sodium metavanadate, fertility, testicular toxicity, 199

testicular toxicity, sodium metavanadate, fertility, Swiss mice, 199
testis, cadmium, metallothionein, liver, kidney, strain differences, sex differences, age differences, mouse strains, disposition, 51
thiol, flow cytometry, hepatocytes, tributyltin, calcium, glutathione, 117
thiols, methyl linoleate ozonide, lipid peroxidation, vitamin E, rat, 189
total cadmium intake, metallothionein, dose-response relationship, metallothioneinuria, logistic regression analysis, 207
toxic oil syndrome, anilide, anilidase, oleylanilide hydrolase, anilide toxicity, 131
toxicity, epithelial type 2 cell, macrophages, pentamidine, analogues, 1
tributyltin, flow cytometry, hepatocytes, calcium, glutathione, thiol, 117

ventricle, atenolol, blood pressure, carbon monoxide, cardiac hypertrophy, heart rate, heart weight, hypotension, prazosin, 173
vitamin E, methyl linoleate ozonide, lipid peroxidation, thiols, rat, 189

water deprivation, water loading, gentamicin nephrotoxicity, enzymuria, celluria, 141
water loading, water deprivation, gentamicin nephrotoxicity, enzymuria, celluria, 141

zinc, cadmium, embryotoxicity, preimplantation, implantation, blastocyst, nifedipine, metal uptake/efflux, 13
